

Please leave the Indiana "NO CALL" list alone. This has substantially limited the amount of UNWANTED calls we receive each week. The lobbies that are no doubt causing this outside interference represent the same companies that call your homes and drive you nuts while you are busy doing something else. Please allow the Indiana State Legislature to handle the wishes of its constituency. We asked for this law. Please listen to our wishes, not the wishes of powerful lobbies. We matter more. We need our privacy and we deserve the right to choose if we want to receive these calls or not. Thank you for your consideration.
